

# Belleville Memorial ICU Intensive Care Unit Rooms & More

**Architect:** Archimages  
**Contractor:** Rhodey Const.  
**Location:** Belleville, Illinois

We were proud to partner with Rhodey Construction and Memorial Hospital Belleville on the completion of their new Intensive Care Unit (ICU). This remarkable project featured custom headwall and footwall units, cabinetry, sinks, workstations, a breakroom, and more. The design pairs the inviting warmth of Formica Ginger Root Maple High Pressure Laminate (HPL) with the sleek, modern appeal of Solid Surface Formica Luna Sand. The result is a thoughtfully designed space that balances functionality, comfort, and a modern aesthetic to support both patients and healthcare professionals.

**Casework/Headwall/Footwall:** Formica Ginger Root Maple HPL, Custom Wilsonart Colors HPL on Footwalls

**Countertops:** Solid Surface Formica Luna Sand

**Spaces:** Intensive Care Unit Rooms, Workstations, Breakroom

*Our passion. Your vision. Delivered to perfection.*
